

Flex Databases Modules Overview

Flex Databases is a company that provides e-solutions for clinical trials. Software provided by Flex Databases makes the entire clinical trials process and the management of pharma, biotech and CRO seamless and controlled. It means more effective information processing, data management that saves you time, flawless report generation and capabilities plus KPI tracking.

Unlike the majority of similar environments on the market, the Flex Databases platform is completely customizable and can be adapted to meet even the most specific needs. Our wide array of built in modules are designed to address each step of the Research and Development process and give our clients an edge in streamlining their workflow. Flex Databases is a reliable IT vendor that is agile and provides constant client support with our unique understanding of the market and an unwavering focus on quality.

We offer a unique platform which allows you to combine the traditionally separated procedures associated with clinical trials management (CTMS, TMF, EDC&IWRS) with the functionality to run internal pharma companies and CRO processes as well as the capability to manage financial data, invoicing and expenses. Every module developed by Flex Databases is tested, validated and 21 CFR Part 11 compliant.

Expense Reporting

Manage your project related expenses effectively. Avoid belated payments with highly customizable and comprehensive Expense Reporting Module.

Main Features and Advantages

- Project-based expense management
- The project list from the Project Management Module is used; no need to manually set up projects on the system
- Automatic management of exchange rates and foreign currency expenses from external websites such as oanda.com without user intervention
- Expense tracking by item
- Data upload from client's banking systems
- Combined receipts scanning. Upload and attach receipt images made on mobile devices or scanners.
- When multiple receipts are scanned on one sheet, the module allows to easily extract separate images
- Approval process, reporting and automated alerts fully customizable according to your organization's processes
- Possibility to create complicated approval workflow
- Export to financial software
- Integration with all common accounting packages, allowing to feed the data straight into your organization's finance department for payment processing
- Cash management
- Office expenses
- Out-of-box report

Fast, flexible and accurate expense calculation and analysis.
