

Flex Databases Modules Overview

Flex Databases is a company providing e-solutions for clinical trials. Software provided by Flex Databases helps making the processes of conducting clinical trials and managing pharma, biotech and CRO seamless and controlled. It means more effective data processing, less time required for managing data, avoiding mistakes in reports generation, endless reporting capabilities and KPI tracking.

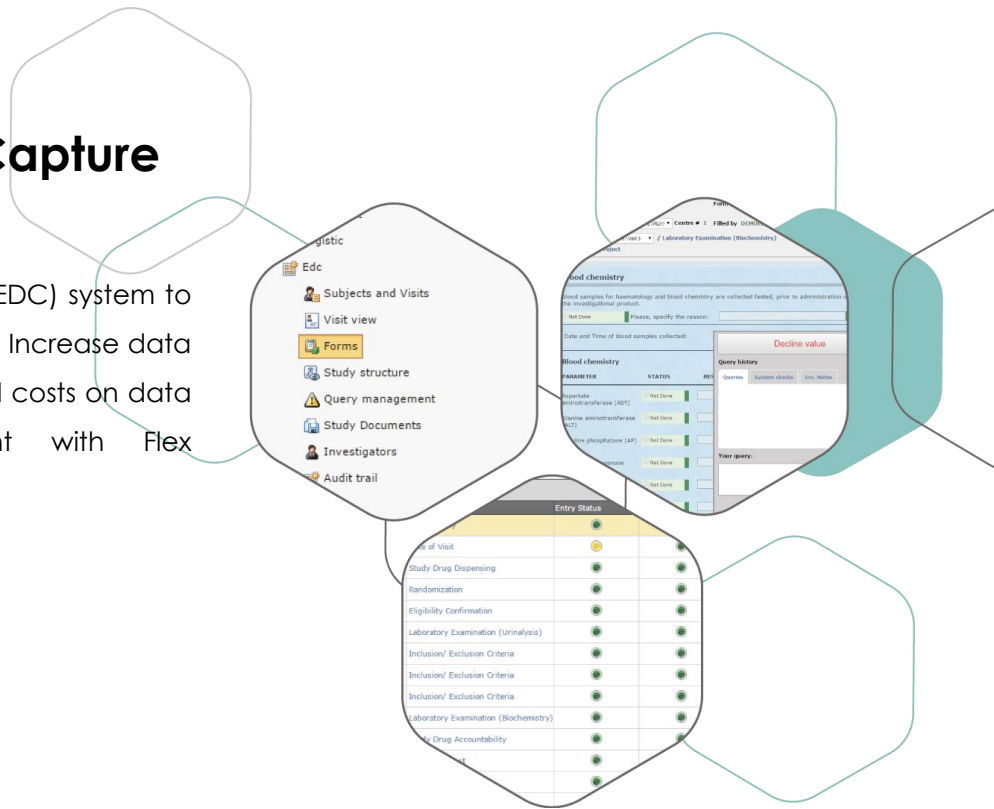

Flex Databases platform is easily customizable, any client's requirement may be configured, it distinguishes us from many other companies. The range of modules offered by Flex Databases is very wide and covers all processes within R&D company. By choosing Flex Databases our clients win a solid, reliable IT vendor with fast feedback, flexible approach and constant client support with a focus on quality.

We offer a unique platform which allows combining traditional features related to management of clinical trials (CTMS, EDC&IWRS) with the functionality for running internal pharma companies and CRO processes as well as a capability to manage financial data, invoicing and expenses. All modules developed by Flex Databases are validated and 21 CFR Part 11 compliant.

Electronic Data Capture

Use Electronic Data Capture (EDC) system to gain total control of your data. Increase data quality while reducing risks and costs on data capture and management with Flex Databases EDC system.

Main Features and Advantages

- Fully managed Cloud Hosting
- Robust back-up processes
- Risks mitigation
- Unlimited database capacity at no extra charge
- Unlimited help desk support
- Unlimited number of users (site staff)
- Self-service management of users, studies and sites
- Customizable sponsor access to the system
- Trainings for DM staff, CRAs and Investigators
- Self-service study build and unlimited mid-study changes
- Online Data validation
- Ability to implement complex index online calculations
- Customizable real-time notifications
- Domain, plain and other data exports
- eCRF certified copy export
- Annotated eCRF export
- Online KPI reports
- Generation of standard and project-specific reports
- Viewing, updating, querying and locking data
- Configurable Data Management workflows
- Medical coding and medical coding results review
- Fully-integrated accessible audit trail

Electronic Data Capture system allows you to collect and manage data in clinical trials using your ordinary web browser.
