

Flex Databases Modules Overview

Flex Databases is a company providing e-solutions for clinical trials. Software provided by Flex Databases helps making the processes of conducting clinical trials and managing pharma, biotech and CRO seamless and controlled. It means more effective data processing, less time required for managing data, avoiding mistakes in reports generation, endless reporting capabilities and KPI tracking.

Flex Databases platform is easily customizable, any client's requirement may be configured, it distinguishes us from many other companies. The range of modules offered by Flex Databases is very wide and covers all processes within R&D company. By choosing Flex Databases our clients win a solid, reliable IT vendor with fast feedback, flexible approach and constant client support with a focus on quality.

We offer a unique platform which allows combining traditional features related to management of clinical trials (CTMS, EDC&IWRS) with the functionality for running internal pharma companies and CRO processes as well as a capability to manage financial data, invoicing and expenses. All modules developed by Flex Databases are validated and 21 CFR Part 11 compliant.

Interactive Web-Response System

Flex Databases Interactive Web-Response System (IWRS) supports any type of randomization and drug dispensing. The system is set up by our specialists individually for each project according to the requirements of the study protocol. IWRS by Flex Databases provides drug supply/shipment management.

Main Features and Advantages

- Seamless integration with Electronic Data Capture (EDC)
- Randomization types supported: simple, block, based on stratification factors, dynamic and other
- Randomization and automated drug dispensing conditions verification
- Online randomization and drug status control
- Dosage calculations based on different parameters
- Any types of customizable real-time notifications
- Automated audit trail
- Customizable investigators and pharmacist's interfaces
- Subject status control based on randomization results
- Drug supply management

Manage all types of randomization and drug dispensing with Flex Databases IWRS System.
