

Flex Databases Modules Overview

Flex Databases is a company providing e-solutions for clinical trials. Software provided by Flex Databases helps making the processes of conducting clinical trials and managing pharma, biotech and CRO seamless and controlled. It means more effective data processing, less time required for managing data, avoiding mistakes in reports generation, endless reporting capabilities and KPI tracking.

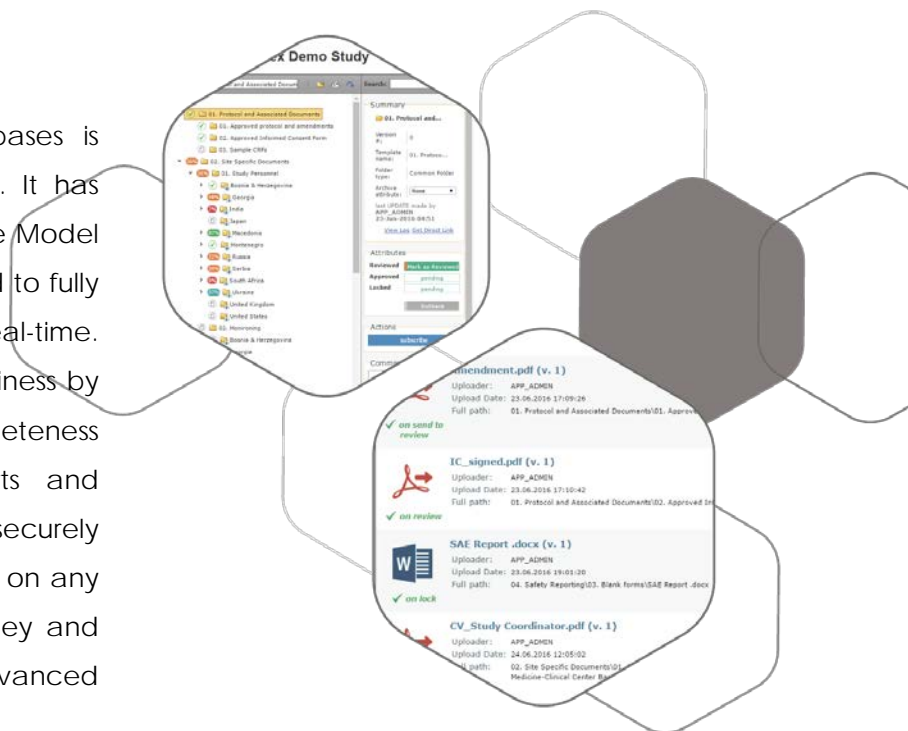

Flex Databases platform is easily customizable, any client's requirement may be configured, it distinguishes us from many other companies. The range of modules offered by Flex Databases is very wide and covers all processes within R&D company. By choosing Flex Databases our clients win a solid, reliable IT vendor with fast feedback, flexible approach and constant client support with a focus on quality.

We offer a unique platform which allows combining traditional features related to management of clinical trials (CTMS, EDC&IWRS) with the functionality for running internal pharma companies and CRO processes as well as a capability to manage financial data, invoicing and expenses. All modules developed by Flex Databases are validated and 21 CFR Part 11 compliant.

Trial Master File

Proven TMF Solution by Flex Databases is designed for Life Sciences Industries. It has been developed using TMF Reference Model and it enables you to systematize and to fully control your document flow in the real-time. TMF ensures constant inspection readiness by means of automated folders completeness statistics, missing documents reports and various notifications.
